EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert Lewis on October 4, 2004. The application has been amended as follows:

IN THE CLAIMS:

Cancel claims 18-43 and 62.

Claim 44, line 1, before "plurality", delete "A" and insert -- In combination, a plurality of microarray spotting members, and a --.

Claim 44, line 1, delete "a" and insert --the--.

Claim 61, line 5, after "members", insert --, wherein turbulence is created in air by: applying a source of vacuum to the spotting members of the assembly to draw air around the spotting members to flow from the inlet to the outlet, aligning the spotting members proximate to the apertures with each spotting member body extending generally axially away from the corresponding aperture, repeatedly reciprocating the microarray spotting members generally axially toward and away from the apertures and limiting axially inward travel to provide clearance with the aperture in the limiting position to create turbulence in air flowing from the inlet to the outlet in the space between the spotting member and the aperture for removing liquid from the first open end portions of the spotting members--.

Claim 63, line 1, change "62" to -61--.

2. The following is an examiner's statement of reasons for allowance: Claims 44-58,60-61,63-69 and 90 are allowable over the prior art since the prior does not teach or fairly suggest the combination of microarray spotting member and manifold assembly wherein the manifold holds the tips of the microarray spotting members such that turbulent air flow is created around the tips to remove liquid from the tips. The prior art does not teach or fairly suggest the method of removing liquid from the microarray spotting members substantially as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

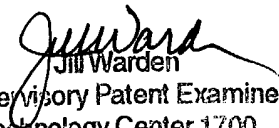

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jyoti Nagpaul whose telephone number is 571-272-1273. The examiner can normally be reached on Monday thru Friday (8:00-4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill Warden can be reached on 571-272-1267. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
